

DEFINITIONS AND SPECIAL INSTRUCTIONS

1. Scope of survey

This survey covers manufacturers of footwear regardless of material. Footwear made entirely within the United States (including those made with imported uppers) and footwear cut in the U.S., shipped to a foreign country for assembly, and shipped back to the U.S. under import category "9802" (formerly "807"), should be included.

Note: Also include production and shipments of Puerto Rican plants of domestic companies.

2. Figures to be reported

Companies with more than one establishment manufacturing the products covered by this survey are requested to complete a separate report form for each location. If you have not received a separate form for each of your establishments, please call the contact shown on the report form or write to the U.S. Census Bureau for additional forms.

a. Who should report

All producers of shoes and slippers, whether made on conventional shoe machinery, or with sole vulcanized, molded, or cemented to fabric upper.

Producers of rubber shoes and boots and/or over-the-shoe rubber or plastic protective footwear.

b. Who should not report

Firms engaged solely in buying or importing shoes and/or slippers and reselling them without further manufacture.

Firms engaged solely in buying shoes from others and attaching ice skate runners or wheels.

c. Quantity and value of shipments

The figures on quantity and value of shipments should include the physical shipments of all products sold, transferred to other establishments within your company, or shipped on consignment, whether for domestic or export sale. The value represents the net sales price, f.o.b. plant, to the customer or branch to which the products are shipped, net of discounts, allowances, freight charges, and returns. Shipments to your own branches should be assigned the same value as comparable sales to unaffiliated customers, i.e., the value includes an appropriate allocation of company overhead and profit.

Products bought and resold without further manufacture should not be included in shipments.

Report production and quantity of shipments in thousands of pairs and value of shipments in thousands of dollars.

Include:

Footwear made by you for others from your materials (including government contracts)

Footwear cut in the U.S., shipped to a foreign country for finishing, and shipped back to the U.S. under import category "9802"

Note: Also include production and shipments of Puerto Rican plants of domestic companies.

Exclude:

Imported lasted uppers that are imported as finished footwear

Footwear produced outside the 50 states of the United States or Puerto Rico

Footwear made by you for others from their material

Footwear purchased and resold without further manufacture

Shoes purchased from others to which you only attach ice-skate runners or wheels. Firms producing these shoes on contract or for sale to others should report them as athletic shoes

Slipper-socks and booties

Section I, NONRUBBER FOOTWEAR — Include all footwear, except rubber or plastic soled/fabric upper shoes, such as tennis shoes, running shoes and espadrilles, and rubber and/or plastic protective footwear. Include slippers regardless of material.

Section II, FOOTWEAR WITH RUBBER OR PLASTIC SOLES/FABRIC UPPER (EXCLUDES SANDALS AND SLIPPERS) — Include sneakers, espadrilles, and running shoes with rubber or plastic soles and fabric upper. Cemented slippers and sandals, and cemented, vulcanized, or injection molded vinyl upper slippers should be reported in Section I under appropriate age/sex category.

Section III, RUBBER AND PLASTIC PROTECTIVE FOOTWEAR — Include boots, lumberman's and PACS, arctics and gaiters, rubber and other footwear designed to be worn over or in lieu of other footwear as a protection against water, oil, grease, chemicals, or cold or inclement weather.

Section IV, PRODUCTION OF FOOTWEAR BY TYPE OF UPPER AND TYPE OF SOLE

Include all footwear reported in column 3 of sections I through III. Classify footwear according to the materials which constitute the chief surface area.

3. Definitions

Rubber or plastic soles/fabric upper running shoes — Include in Section III according to type of construction.

Cemented fabric upper sandals — Include in Section I as sandals.

Athletic shoes — All athletic type shoes, whether designed for organized sports or street wear. Include golf shoes, football shoes, skating shoes (if you make the shoe), track shoes, joggers, etc. Report all shoes with cleats as athletic shoes.

Slippers — All footwear designed for indoor or housewear. Include shearing moccasins but not moccasin-socks combinations or rubber slippers. Include foldables and packables. Include rubber soled/fabric uppers.

All other footwear — All other footwear (except those with sole vulcanized to fabric upper and rubber and plastic protective footwear) not specifically included above. Do not include rubber footwear or rubber or plastic soled/fabric upper shoes.

Work oxfords and work boots — Includes shoes usually made with heavier upper materials and often with double soles. Designed for rugged service and wear.

Fabric upper footwear — Footwear with open toes or open heels; footwear of the slip-on type; that is, held to the foot without the use of laces or buckles or other fasteners, except footwear having foxing or foxing-like band wholly or almost wholly of rubber or plastics applied or molded at the sole and overlapping the upper.

Fabric upper cement process shoes — Footwear having soles (or midsoles, if any) of rubber or plastics which are affixed to the upper exclusively with an adhesive (any midsoles also being affixed exclusively to one another and to the outsole with an adhesive); the foregoing except footwear having a foxing or foxing-like band applied to or

molded at the sole and overlapping the upper and except footwear with soles which overlap the upper other than the toe or heel.

Other fabric shoes — This includes all fabric shoes with rubber or plastic soles vulcanized or molded to a fabric upper, except slippers primarily intended for indoor household use and sandals. Includes sneakers.

Protective footwear — Boots, lumberman's and PACS, arctics and gaiters, rubbers and other footwear designed to be worn over or in lieu of other footwear as a protection against water, oil, grease, or chemicals or cold or inclement weather.

Boots — These are worn "over the foot" or "over the sock" and are normally worn for industrial or commercial use, but boots for dress or "commuter" use should also be included if they are "over the sock" and not "over the shoe." No distinction is made to reflect varying processes of manufacture

Lumberman and PACS — These are worn "over the foot" and are normally used for industrial, commercial, or sporting purposes. They include PACS, work shoes, and lumberman overs, with or without tops. No distinction is made to reflect varying processes of manufacture.

Arctics and gaiters — These are worn "over the shoe" and are above ankle height all weights, work and dress, with or without fasteners.

Light and heavy rubbers — These are worn "over the shoe" and are ankle height.

Protective footwear with fabric upper — Boots, lumberman and PACS, and arctics and gaiters designed to be worn over, or in lieu of, other footwear as a protection against water, oil, grease, or chemicals or cold or inclement weather, having upper of more than 10% fabric.

Sizes — The size categories used for this survey are the same as those used in the Tariff Schedule of the United States. They are as follows:

Men's shoes — Sizes run 6 and over

Women's shoes — Sizes run 4 and over

Juveniles' shoes —

Youths' and boys' shoes — Sizes run 12½ – 5½

Misses' shoes — Sizes run 12½ – 3½

Children's shoes — Sizes run 8½ – 12, including little boys

Infants' or babies' shoes — Sizes run 0–8

4. Comparability

Data reported in this survey should correspond to data reported in the Economic Census - Manufacturing Sector form. The sum of values for item codes shown in column (a) should correspond to the dollar values reported under product codes indicated in column (b) below:

Current Industrial Reports (Form MA316A)	Economic Census - Manufacturing Sector
Item codes (a)	Product codes (b)
2401–2409	3162130 000
2423–2428	3162140 000
2431–2455, 2481	3162190 000
2463–2467	3162190 000
2471–2475	3162126 000
3001–3105	3162114 000
4705–4745	3162111 000
